Retired Lorain Police Officer, K-9 Handler,  
Trainer

Classes are created to give you the skills you need to teach your dog obedient skills.

Skills are taught by using positive reinforcement for motivation, which will also include voice commands and hand signals. The class last for six weeks and range from 45 minutes to an hour per session.

We offer group classes, and one-on-one classes. The group classes are designed to teach your dog around other dogs. Dogs are able to socialize with other dogs, and learn at the same time, so it is educational and fun. Our group classes will be limited to 10 dogs per class to allow more attention to you and your dog. The one-on-one classes consist of you, your dog, and the trainer. These can be set up to accommodate your schedule.

By the end of your 6-week class, you and your dog will have the building blocks needed to create a better quality of life through obedience training.

**Puppy Classes**

This Class is for puppies 8-16 weeks of age. The puppy classes are basically intended to socialize your pet with new people and different surroundings. Not to say your puppy won't learn anything, but puppies will be puppies. They need to be a little older to not only learn, but to retain what they have learned. That being said, it is a great start for your puppy, and puts them on the right track to becoming your family pet you've always wanted.

**Obedience Training**

Obedience Training is for dogs over 4 months of age. We will hold classes designed to help teach your dog the obedient skills he/she needs. Here is a short list of what you and your dog will learn in class:

**Sit \* Heel \* Down \* Stay \* Come \* Off \*  
No-Jumping \* Walking \*  
Leave-It \* Quiet (No Barking)**

**Advanced Obedience**

If home security is an issue, or you just want your dog to be more protective around you and/or your loved ones this might be a good option for you. You can give us a call and check into our Dog Training Program.

**We specialize in Large Breeds, Dogs  
with Aggression or Behavioral  
Problems.**
